

Chain & Chisel Mortiser

Chain and Chisel mortising machine provided the most rapid method of producing a perfectly clean and true mortise at one stroke by means of the endless chain cutter of chisel. The head stock is suitable counter balanced for smooth and easy working. The table is compound slide for lateral movement by screw adjustment and longitudinal traverse by hand wheel provided with quick action screw clamp for holding the timber adjustable stops are provided to control the length and depth of motorised and having the following specifications.

SPECIFICATIONS

Maximum size of chain	20 mm
Maximum size of chisel	12 mm
Depth of bore	150 mm
Longitudal table movement	230 mm
Lateral movement	150 mm
HP required	3 HP
Floor space required	750 x 850 mm
Net weight	800 Kgs.

Chisel Mortising Machine

Indigenous make floor model motorised chisel motorising (square holes drilling) machine ideally suitable for making square holes in wooden article such as doors, windows, etc., equipped with 1/2 HP AC 440/3/50 2800 RPM electric motor, starter, tool holder with 19 mm bore, working table size 765 mm x 150 mm having longitudinal travel 300 mm cross travel 115 mm max. travel in vertical direction 425 mm approx. weight 250 Kgs.

SPECIFICATIONS

Model	IMI-13	IMI-20
Capacity for Square holes in wood holes mm	13	20

MOTORISING HOLLOW CHANNELS

Motorising hollow chisels with augers for making square holes in wood, plastic, sheets etc.
